

Cochineal red

CAS#: 2611-82-7

Where is this allergen found?

Cochineal red is a deep crimson red dye. It is used as a fabric and cosmetics dye and as a natural food coloring, as well as in oil paints, pigments, and watercolors. The water-soluble form of this dye is found in alcoholic drinks with calcium carmine. It can also be found in meat, sausages, processed poultry products, marinades, bakery products and toppings, cookies, desserts, icings, pie fillings, jams, preserves, gelatin desserts, juice beverages, varieties of cheddar cheese and other dairy products, sauces, and sweets. The pharmaceutical industry uses this dye to color pills and ointments.

How can you avoid contact with this allergen?

Avoid products that list any of the following names in the ingredients:

- 1,3-Naphthalenedisulfon c acid, 7-hydroxy-8-((4-sulfo-1-naphthalenyl)azo)-, trisodium salt
- 1-(4-Sulpho-1-naphthylazo)-2-naphthol-6,8-disulphonic acid, trisodium salt
