EE359: Triethanolamine

CAS#: 102-71-6

Patient Information

Your patch test result indicates that you have a contact allergy to triethanolamine. This contact allergy may cause your skin to react when it is exposed to this substance although it may take several days for the symptoms to appear. Typical symptoms include redness, swelling, itching, and fluid-filled blisters.

Where is triethanolamine found?

Triethanolamine is a pH balancer found in cosmetic products such as skin lotion, eye gels, moisturizers, shampoos, and shaving foams.

How can you avoid contact with triethanolamine?

Avoid products that list any of the following names in the ingredients:
