

## Ceteraryl Glucoside

CAS#:

## Where is this allergen found?

---

Ceteraryl glucoside is a surfactant and is used as an emulsifier and texture enhancer in cosmetic products.

## How can you avoid contact with this allergen?

---

Avoid products that list any of the following names in the ingredients:

- D-Glucopyranose
- C16-18 alkyl glycosides

## What are some products that may contain this allergen?

---

Baby products, bath products, cleansing products, skin care products, body-firming lotion, eye makeup and hair care products including hair dyes and colors.

For additional information about products that might contain this allergen, visit the Consumer Product Information Database. These lists are brief and provide just a few examples. They are not comprehensive. Product formulations also change frequently. Read product labels carefully and talk to your doctor if you have any questions. These are general guidelines. Talk to your doctor for more specific instructions.
