PF144: Oil of eucalyptus

CAS#: 8000-48-4

Patient Information

Your patch test results indicate that you have a contact allergy to oil of eucalyptus. This contact allergy may cause your skin to react when it is exposed to this substance although it may take several days for the symptoms to appear. Typical symptoms include redness, swelling, itching, and fluid-filled blisters.

Where is oil of eucalyptus found?

Oil of eucalyptus is found in pharmaceuticals, antiseptics, repellents, baked goods, confectionery, meats, beverages, fragrances, dental care products, soaps, and industrial products.

How can you avoid contact with oil of eucalyptus?
